

# Pediatric Milestone Study Map

Milestones are ranges and patterns; screening and caregiver concerns matter more than a rigid birthday cutoff.

|                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                          |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Infancy themes</b> <ul style="list-style-type: none"><li>- Rapid motor progression from head control toward sitting and mobility.</li><li>- Social smile, babble, and attachment behaviors emerge over time.</li><li>- Safe sleep, feeding, growth, and immunization teaching are central.</li></ul> | <b>Toddler/preschool themes</b> <ul style="list-style-type: none"><li>- Language expands, play becomes more interactive, and independence grows.</li><li>- Expect regression during illness or stress.</li><li>- Use simple choices and concrete explanations.</li></ul> |
| <b>School-age/adolescent themes</b> <ul style="list-style-type: none"><li>- Peers, privacy, identity, and body changes gain importance.</li><li>- Include the child in teaching at the right developmental level.</li><li>- Report lost skills or significant delay concerns for evaluation.</li></ul>  |                                                                                                                                                                                                                                                                          |
